DOTTS

TRAIN. GAIN. RETAIN.

HIGH QUALITY, PROPER TRAINING

We are specialists in what we do; we provide hands-on training with a specific focus on vocational learning in Plant Operations.

We believe that qualification is best delivered as a practical subject, with learners spending time “doing the job”, which creates a highly skilled and retainable workforce. This is why many people choose to train with us; we are passionate about what we do, we said we care, and we prove continually that we really do, and we want you to be the best.

OUR VISION

Our vision is to become the provider of choice, working alongside our clients and learners, developing strong relationships and alliances, whilst also being recognised for making a positive difference to industry performance and peoples’ lives.

OUR PROMISE

Aftercare and support to maintain motivation to learn
We build meaningful relationships and ensure learning doesn’t stop once you leave us with your newly acquired skills.

CONSTRUCT YOUR FUTURE. CONNECT THE DOTTS.

WHY CHOOSE DOTTS?

Professional service

We are renowned for our professional service and what better way to prove it than winning 'Best Plant Training and Consultancy award 2023', awarded by Corporate Vision in the Education and Training Awards.

Value for money, quality service

DOTTS have invested heavily into plant and equipment to provide an enhanced learner experience. We have a whole range of attachments and equipment to work with, all at a very competitive price.

Individually tailored courses

We have developed bespoke training packages for Eurotunnel, Translink and Heritage Railways. If you have a unique environment or equipment that requires a bespoke solution, DOTTS can support.

Experienced instructors

Our trainers have had extensive careers working on various UK infrastructure projects. All of our trainers remain operational, so they are up to date with current industry practice. This, along with their wealth of knowledge, means our training is unrivalled.

SENTINEL TRAINING (RAIL)

We provide training packages to suit a wide range of disciplines for the Rail sector.

On Track Plant (OTP)

Co-ordination & Planning

OLE Engineering

Track Safety

DOTTS are NSAR assured to deliver all aspects of On-Track-Plant Training and Assessment

RAIL PLANT COURSES

DOTTS are NSAR assured (RTAS0462) to provide training and assessment under the RTAS scheme to award sentinel competence in the above disciplines.

Our main specialism is OTP competency; all of our trainers are time-served, remain operational and are considered leaders in their disciplines.

Machine/Crane Operator

The role of a Road Rail Plant Operator is to deliver and/or operate equipment anywhere on the UK Infrastructure, with the possibility of highways, construction and utility sites. The following categories are the main machine/crane operator categories on the sentinel framework.

Machine/Crane Controller

Machine/Crane Controller modules are intended for candidates who wish to work on or near the line on Network Rail's infrastructure and come into frequent contact with OTP machines and attachments as part of their normal working duties.

Crane controllers are responsible for controlling the lifting operations of a variety of OTP machinery to do tasks such as removing material i.e. soil/dirt/ballast, moving equipment around a worksite, or creating new structures.

Machine controllers are responsible for controlling the operations of a variety of OTP machinery to do tasks such as removing material i.e. soil/dirt/ballast, moving equipment around a worksite, or creating new structures.

Both Crane Controllers and Machine Controllers typically require good spatial awareness and coordination to assist large scale machinery and good communication skills to work in conjunction with machine operators.

OTP Operator Attachments

The OTP Attachment courses are intended for candidates who hold the relevant Machine/Crane Operator Competency. The Attachment courses are designed to provide individuals with the skills to safely operate and transport each attachment around a worksite. We provide attachment courses in the following disciplines;

Co-ordination & Planning

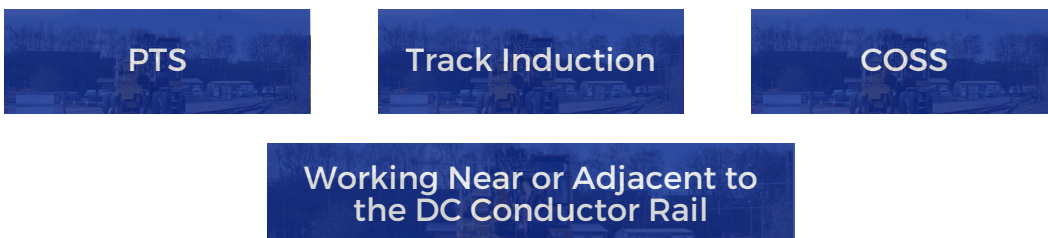

These courses are designed to train persons who are responsible for undertaking roles with Lift Planning and the Control of Any Line Open as part of their duties on network rail infrastructure.

The courses are designed to develop a person's knowledge, understanding and skills in both planning and coordination of safety critical Plant activity.

Track Safety

Our Railway Safety Training Courses provide our clients with the skills, knowledge and certification to ensure that railway works are carried out efficiently, safely and in full compliance with Network Rail Group Standards. The courses serve as the vital entry point into the industry for any operator or machine/crane controller.

RECERTIFICATIONS

Recertifications at DOTTS

Recertifications refresh delegates' underpinning core knowledge and skills required to undertake machine and crane operating within the OTP training framework.

Recertifications can be booked up to 3 months in advance and they are much more straightforward and cost effective than letting them lapse altogether, therefore requiring initial training.

Competency expiring soon?

Book up to 3 months in advance

There is an 8 week grace period allowed beyond the competency expiry date in which you can still undertake a recert

Once expired, you will no longer be able to use your competency until it has been recertified

CONSTRUCTION

CPCS

Our trainers are time-served operators with proven track records in Demolition, Earthworks, Utilities, Pipeline Works and Housebuilding Site Works, and are also accredited under CPCS. Rest assured, we have the knowledge and know how to pass on.

SITE READY PLANT OPERATOR COURSES

What do we mean by site ready courses?

Our site ready courses are designed to replicate activities machine operators are expected to undertake in a worksite environment.

So, whether you are a new entrant or an existing machine operator looking to continue and enhance your professional development, site ready courses are suitable for you.

DOTTS specialise in heavy plant operational training centred around simulating a real life environment.

We specialise in many different aspects of Dozer, Excavator, Dumptruck and Safe Lifting Operations, as well more common items such as Dumpers and Rollers.

We focus specifically on our clients needs, whether that be Earthworks, Utilities, or Housebuilding sites, we tailor the course to suit your needs.

Why? Because we know how to, that's why!

CPCS TRAINING

Where can I train?

All CPCS Training is delivered from Training Centres located in either East or West Midlands.

What level am I?

We will work with you throughout your training to judge your experience, providing you with regular feedback.

The DOTTs Guarantee

We never flood our courses, and focus specifically on the right combination of learners per machine/trainer to ensure you get the seat time and attention you need.

NVQS

NVQs at DOTTs

At DOTTs, we specialise in NVQ's for Plant Operations and Lifting Operations. We offer assessment and certification throughout the Midlands and Nationwide. Our NVQ courses will allow you to progress from a CPCS "Red Card" to a "Blue Card".

NVQ's can be used throughout your career and can be taken to all employers with the knowledge that it shows credibility, competency and skills and the ability to work to the recognised industry standards.

After successful completion of a CPCS Technical Test, candidates will be issued with a Red Trained Operator Card which is valid for 2 years. This gives the candidate time to gain experience, skills and more knowledge within the industry to successfully work towards an NVQ and upgrade to a Blue Competent Operator card.
