# CONSTRUCT YOUR FUTURE, CONNECT THE DOTTs

Did you know, that although DOTTs specialise in OTP, we also specialise in Construction Plant operational training accredited under the CPCS scheme. We cover Dozers, Excavators, Dumptrucks and Safe Lifting operations, as well as more common items such as dumpers, rollers and telehandlers.

Our trainers are time served operators with proven track records in Demolition, Earthworks, Utilities, Pipeline works and Housebuilding sites. Rest assured, we have the knowledge and the experience to pass on.

## WHAT DOES THIS MEAN FOR YOU?

Whether you have novice, intermediate or advanced learners, we run courses that can cover everything from the basics to more detailed and intricate aspects. We focus specifically on our clients needs and tailor the course accordingly.

Here's what our client had to say about recent training

To find out more about the construction courses we are running, please contact [chris@dotts.co.uk](mailto:chris@dotts.co.uk) for more information or call on 07463696956

"Chris came over to Jersey to deliver advanced lifting operations training for our Operators. The course was well structured, very informative and a real eye opener. All operators came away learning a new thing or two. Excellent training service from DOTTs"

**Pierce Cummins, DB Cummins**

## LET'S GET DIGITAL, DIGITAL.....

DOTTS have invested into some new technology, so you may start to spot that our look and feel around documentation and processes is changing for the better. We have invested into a website makeover as well as a new training management system which is set to go live in the forthcoming months. Both systems are supporting us to improve our efficiency by automating processes and freeing up valuable time to better respond to our client needs.

**FOLLOW US TO STAY IN THE LOOP!**

## WHAT DOES THIS MEAN FOR YOU?

All open courses will be published live in real time on our website through the link-up to our training management system. Any client will be able to search courses, dates and available spaces directly from a search tool on our website and enquire into the course space using the form provided. We want to empower our clients to save time for yourself and for your team by making our course availability accessible to everyone.

And of course, should you prefer to speak to a member of the DOTTS team we will now have more time to dedicate to you to work through more complex training requirements. Please do not hesitate to contact us on [training@dotts.co.uk](mailto:training@dotts.co.uk) for more information

P.s Extra DOTTS bonus if you can name the song from those spin-off lyrics in the title.

**Train. Gain. Retain.**

## MOOOOIVING ONTO PASTURES NEW

After 2 years, 6 different plans, lots of money spent on planning consultants, drainage/flood plans, topological and archeological surveys, as well as farm diversification plans - we finally got the news we had been hoping for in that our planning permission for our new site has been approved. We are currently mobilising for the opening of a new 9 acre training site in spring 2024, which will be utilising non-arable farming land in the Derbyshire area of Doveridge. The site is accessible from the A50, and has great road links to the North-East and South via the A38/M1 as well as the North-West and Midlands via the A38/M6. The site will serve to provide valuable practical training for OTP as well as be the new home for all our "Site Ready" operator training on the Construction side.

## WHAT DOES THIS MEAN FOR YOU?

DOTTs want learning to be accessible for all, and with increasing clients in the Midlands, South, North-West and North-East of England we strategically looked for a venue that would offer more convenience, better travel times and also better facilities to enhance the customer experience and quality of training. We hope you will all share our excitement over this new chapter of DOTTs.

We will keep you updated on our progress in future newsletters, but if you want to stay in the loop, please follow DOTTs on social media.
